

StellarStack®

CERTIFICATE OF RESEARCH COLLABORATION

This is to certify that **Ms. Sabahat Siddique** Registration No: **M24F0023AI003** Student of MS Artificial Intelligence is officially conducting her research work in collaboration with StellarStack.LTD. The research titled **Cognitive Requirements Engineering for the Next Generation of Ethical AI Systems** is being carried out with technical guidance and industry collaboration from StellarStack.Ltd. As part of this research, a web-based application is being designed and developed that aligns with the company's software development practices and ethical AI objectives. This collaboration aims to bridge the gap between academic research and real-world AI system development, focusing on:

1. Cognitive and intelligent requirement analysis.
2. Ethical AI design principles.
3. Transparency, fairness, and accountability in AI systems.
4. Practical implementation through a functional web application.

The company has agreed to support this research in terms of technical consultation, system validation and practical implementation insights.

This certificate is issued upon the request of the researcher for academic and documentation purposes.
